To Whom It May Concern

This letter is written to show services provided by Celpik-T, s.r.o., and by its representative and executive Dan Trajhan in the project of improvement of WWTP plant in OP Papírna/Delfort Group Olšany, Czech republic.

OP Papírna was to increase capacity of the WWTP plant due to requirement of the mill production increment by start-up of new paper machine PM6.

This WWTP modification contains of the

- Raw water preparation (filtration) : capacity increase by new equipment installation with all piping, power and instrument connection
- Waste water treatment plant extension : total flow increase, sludge handling capacity increase incl. final dewatering improvement, by new equipment installation with new building erection, piping, power and instrument connections
- Full transition to a new control system
- New system of Hydrant water supply by installation of set of electric pumps with standby Diesel aggregate pump

Scope of works provided by Mr. Trajhan along the project time life

- o Feasibility check of supplier's proposed solution
- o Preparation of required information and documentation for tendering processes of specified parts and/or preparation of inquiries and tendering
- o Assessment and selection final technical solution, or proposal for the installations. Supplier selection assistance
- o Time planning and control in coordination with whole mill time-schedule
- o Supervision of assembly and installation and piping erection
- o Start-up supervision
- o Preliminary and final acceptance tests participation
- o Coordination within concerned professions – civil, el.power, control and measurement participation
- o Documentation review and modification for the issue of „As-built“
- o Total review of the flowsheets of the complete WWTP and Filtration/Raw water treatment plant
- o Creation of 3D plant model and 2D documentation for parts where needed

Celpik-T, s.r.o. was selected for the project consultancies as long lasting and outstanding experienced expert in Mechanical Engineering as well specialized in Pulp and Paper industry.

Requested services fulfilled expectations of OP Papírna/Delfortgroup as customer, works were provided in a professional manner, according to mill requirements, prescribed standards and needs of the erection companies and suppliers.

As well was followed time-schedule avoiding delays within full process – supplier task description, final selection, erection, deliveries and start-up.
